SUMMARY

AI/ML Engineer holding a Master's degree in Data Science from Université Sorbonne Paris Nord. Experienced as an AI Engineer at LUSAC (France), with hands-on expertise in deep learning, computer vision, time series forecasting and LLM applications, including RAG, Transformers, AI agents, LLM fine-tuning and API integration. Seeking a full-time AI Engineer / Data Scientist position.

Education

Master's Degree in Computer Science – Data Science **2025 – 2026**
Université Sorbonne Paris Nord — Institut Galilée *Paris, Villetaneuse, France*

Bachelor's Degree in Mathematics & Computer Science **2021 – 2024**
Faculty of Sciences Dhar El Mahraz, Sidi Mohamed Ben Abdellah University *Fez, Morocco*

TECHNICAL SKILLS

Programming	**:** Python (advanced), Java
Data Science	**:** pandas, NumPy, SQL, data cleaning, feature engineering, statistical analysis, ETL/ELT
ML & DL	**:** PyTorch, TensorFlow, Keras, scikit-learn, Hugging Face, regression, classification, clustering, CNN, RNN, LSTM, GRU, Transformers, hyperparameter tuning.
Generative AI	**:** NLP, LLMs, BERT, GPT, RAG, ChromaDB, Prompt engineering, fine-tuning, LoRA, AI agents (LangChain, LangGraph, CrewAI, MCP), API integration
MLOps	**:** Docker, FastAPI, REST APIs, MLflow, AWS, Git / GitHub, CI/CD.
Computer Vision	**:** OpenCV, ViT, object detection, multi-object tracking, image segmentation, video captioning.
Project Management	**:** Agile, Scrum.

PROFESSIONAL EXPERIENCE

AI Engineer Intern – LUSAC, Unicaen, France -- 2026

- Designed and implemented an end-to-end deep-learning pipeline for multi-horizon daily air-temperature forecasting across 3 cities in Normandy (Manche).
- Collected meteorological data through web scraping and APIs, then automated data cleaning and feature engineering.
- Benchmarked SARIMA, Random Forest, XGBoost, LSTM and GRU against persistence and climatology baselines.
- Compared recursive vs. direct multi-horizon strategies; automated data collection, cleaning and feature engineering, and built reusable evaluation utilities.

Computer Vision Intern – L3IA, FSDM, Maroc -- 2024

- Built a real-time video tracking system combining YOLO detection with Deep SORT multi-object tracking across 8 custom object classes.
- Collected training images through web scraping, then annotated and prepared custom datasets for model training.
- Developed a FastAPI web application for video loading, live visualization of tracked objects and trajectory display.

PROJECTS

Multimodal RAG Assistant — Master's project, FSDM Fès, 2025 · Python, Mistral, Llama 3, DeepSeek, LangChain, CrewAI, Whisper, Streamlit

- Built a conversational assistant combining several LLMs (Mistral, Llama 3, DeepSeek) with a RAG architecture, grounding answers in reference documents through semantic search over vector databases.
- Integrated Whisper for audio transcription and vision-language models for video captioning in the same pipeline.
- Orchestrated specialized agents with LangChain and CrewAI for scenario-based conversations, guided correction, summaries and contextual questions, with a Streamlit interface.

Local RAG Assistant for Document Analysis — Master's project, FSDM Fès · Python, LangChain, Hugging Face, FAISS, ChromaDB, local LLM

- Built a fully local retrieval-augmented generation pipeline with no external API dependency.
- Implemented PDF ingestion and chunking, embedding generation, vector indexing, semantic search and LLM-based answer generation.

Multimodal Click-Through Rate Prediction — Master's project, FSDM Fès · Python, PyTorch, Transformers, ViLT, PCA, FiBiNET

- Fused textual, visual and user-history signals to predict click-through probability.
- Generated joint text-image embeddings with ViLT, applied PCA for dimensionality reduction and trained a FiBiNET model for feature-interaction learning.
